

VIVEK KUMAR

📍 Bengaluru, Karnataka 📞 +91 86514 52464 ✉ vk01vivek@gmail.com 🌐 vivek-info-tech 📄 vivek-info-tech 🌐 Portfolio

Professional Summary

Software Engineer with 1 year of experience developing enterprise web applications using Java, Spring Boot, React.js, REST APIs, and MySQL. Strong foundation in SDLC, scalable application development, and problem solving

Technical Skills

Languages : Java, JavaScript (ES6+), Python, C/C++, SQL, HTML5, CSS3
Frontend : React.js, React Router, React Redux, Axios, Bootstrap, Tailwind CSS, DOM Manipulation, JSON
Backend : Spring Boot, Microservices, Spring Cloud Gateway, Struts MVC, JSP, Servlets, REST APIs, Layered Architecture
Database : MySQL, PostgreSQL, JPA/Hibernate, JDBC, HikariCP Connection Pooling, Database Design, Schema Normalization
Security : Spring Security, JWT Authentication, Role-Based Access Control (RBAC), Session Management
Tools : Git, GitHub, Apache Tomcat, Maven, AWS, Agile (Scrum), SDLC, JIRA, JEST, Docker

Experience

Graduate Apprenticeship (Java Full Stack) @ *UR Rao Satellite Centre, ISRO*

Bengaluru | Aug 2025 – Present

- **Engineered 4+ enterprise-grade Java web applications** serving **200+ internal users**, using **Java, Struts MVC, Servlets, JSP, jQuery, Bootstrap, AJAX, and MySQL** delivering scalable and maintainable solutions for mission-critical organizational workflows.
- **Designed** and implemented **secure** role-based workflow systems with **RBAC**, interceptor-driven request processing, **session management, and dynamic dashboards** supporting multiple user roles while adhering to secure software engineering practices.
- **Designed** relational database schemas with normalized tables, foreign-key constraints, **optimized indexing, and HikariCP** connection pooling to improve application performance, scalability, and resource utilization
- **Developed** a responsive bilingual reporting platform with asynchronous AJAX processing, a multi-step workflow, and a custom preview and validation engine, **reducing form submission time by 60%** and improving user experience.
- **Managed** the complete **Software Development Life Cycle (SDLC)** of the STAR (System Test Analysis Report) application, including requirement analysis, architecture design, development, testing, deployment, and continuous feature enhancements.
- **Implemented** a modular layered architecture (**Action, Service, DAO, Model, Utility**) with centralized exception handling and reusable business components, improving maintainability, scalability, and long-term application support.
- **Enhanced** the production **Vehicle Record Management (VRM)** application by implementing new business features, redesigning the MySQL relational database schema with 3 new tables and 8 additional columns, and preserving backward **compatibility with 100% data integrity**.
- **Modernized** legacy government web portals by transforming static websites into responsive Java applications compliant with **GIGW accessibility standards**, improving usability, maintainability, and standards compliance.

Projects

Auction Bidding System

[GitHub](#) | [Live](#)

• *React.js • Spring Boot • MySQL • JPA/Hibernate • REST APIs*

- **Engineered** a responsive **RFQ-based Auction platform** using **React, Spring Boot, REST APIs and MySQL**, featuring real-time bidding, auto-extending auctions, forced close, and a live **L1/L2/L3 supplier leaderboard** refreshed every 2 seconds.
- **Developed RESTful APIs** and a normalized **JPA/Hibernate** data model enabling secure bid submission, real-time ranking, system integration, and event tracking.

AI-Based Medicine Recommendation & Pneumonia Detection

[GitHub](#) | [Live](#)

• *Python • SVM • VGG19 • Machine Learning • Deep Learning*

- **Engineered** an intelligent healthcare platform using **Machine Learning (SVM)** and **Deep Learning (VGG19)** to predict diseases, recommend personalized treatments, and detect pneumonia from chest X-ray images.
- **Developed** a responsive web application for disease prediction and medical image classification using Python, improving usability and diagnostic accessibility through an intuitive user interface..

Education

Bachelor of Technology — Computer Science

Aug 2022 – Jun 2025

Shri Ram Group of Institutions, Jabalpur - CGPA: 7.85

Diploma — Computer Science & Engineering

Aug 2019 – Jul 2022

Government Polytechnic College, Muzaffarpur - CGPA: 8.03

Achievements & Certifications

- **GATE 2026** (Computer Science) — Score: 431
- **Java Full Stack Certification** — Wipro
- **Python Programming Certification** — Cisco
