

VIVEK KUMAR

📍 Bengaluru, Karnataka 📞 +91 86514 52464 ✉ vk01vivek@gmail.com 🌐 [vivek-info-tech](#) 📺 [vivek-info-tech](#)

Professional Summary

Java Full Stack Developer with enterprise experience at **ISRO (UR Rao Satellite Centre)** building secure, scalable web applications using **Spring Boot, React.js, and MySQL**. Skilled in **Microservices architecture, REST API design, Spring Security JWT, and JPA/Hibernate**. Proven ability to modernize legacy systems, design distributed backend services, and deliver production-grade applications with responsive React.js frontends.

Technical Skills

Languages : Java, JavaScript, Python, C/C++, SQL, HTML5, CSS3
Frontend : React.js, Vue.js, Tailwind CSS, Bootstrap, Axios, React Router
Backend : Spring Boot, Microservices, Spring Cloud Gateway, Struts MVC, JSP, Servlets, REST APIs
Database : MySQL, JPA/Hibernate, JDBC, Connection Pooling, Schema Design
Security : Spring Security, JWT Authentication, Role-Based Access Control (RBAC), Session Management
Tools & Cloud : Git, GitHub, Apache Tomcat, AWS, Eureka Service Registry

Professional Experience

Graduate Apprenticeship (Java Full Stack) @ *UR Rao Satellite Centre, ISRO*

Bengaluru | Aug 2025 – Present

- Developed enterprise web applications for multiple ISRO departments using **Java, Spring Boot, JSP, Servlets, Struts MVC, MySQL, and AJAX**, serving hundreds of internal users.
- Designed and optimized **relational database schemas**, implemented connection pooling, and improved application performance, scalability, and data integrity.
- Architected a **CHSS Healthcare Card Management System** using Spring Boot Microservices, Spring Cloud Gateway, Eureka Service Registry, Spring Security JWT, and React.js with role-based access control for Admins, Operators, and Users.
- Built **6 independent microservices** (Auth, User, Dependent, Card Management, Migration, Report) with API Gateway for centralized JWT-based routing, request filtering, and service discovery.
- Developed secure modules with **authentication, authorization, session management**, and dynamic workflow-driven forms with full validation.
- Deployed and managed applications on **Linux VMs using Apache Tomcat**, handling configuration, troubleshooting, and production support.
- Modernized **legacy Struts-based systems** to modern Spring Boot full-stack architecture, improving maintainability and user experience.

Projects

Auction Bidding System

[GitHub](#) | [Live](#)

- React.js • Spring Boot • MySQL • JPA/Hibernate • REST APIs**
- Built a full-stack bidding platform with **auto-extending auction timers** using configurable trigger rules and hard forced-close enforcement.
- Developed **live leaderboard** (L1/L2/L3 ranking by lowest price) refreshing every 2 seconds via REST APIs; implemented normalized MySQL schema with 4 tables managed by JPA/Hibernate.

AI-Based Medicine Recommendation & Pneumonia Detection

[GitHub](#) | [Live](#)

- Python • SVM • VGG19 • Machine Learning • Deep Learning**
- Developed **ML disease prediction** using SVM and **pneumonia detection** using VGG19; built a responsive web app for symptom input and X-ray upload with personalized medication and diet recommendations.

Education

Bachelor of Technology — Computer Science

Aug 2022 – Jun 2025

[Shri Ram Group of Institutions, Jabalpur](#) - CGPA: 7.85

Diploma — Computer Science & Engineering

Aug 2019 – Jul 2022

[Government Polytechnic College, Muzaffarpur](#) - CGPA: 8.03

Achievements & Certifications

- GATE 2026** (Computer Science) — AIR 13,875 | Score: 431
- Java Full Stack Certification** — Wipro
- Python Programming Certification** — Cisco
